

RT38CG6020S9SG TOP MOUNT **FREEZER WITH ALL AROUND COOLING,**

Perfectly harmonious and stylish design

Modern Design

Give your home a stylishly integrated appearance. Its premium built-in design is both neat and modern, but won't look out of place with your existing appliances and cabinets. It also features strikingly beautiful flat doors and recessed handles, so they don't protrude and get in the way.

More space inside

SpaceMax™

Store more food in a spacious interior with 20 liters more capacity*. Unique SpaceMax™ technology uses special high urethane insulation that enables the walls to be much thinner without compromising energy efficiency. So it creates more space inside.

Smart control

Wi-Fi Embedded

Monitor and manage the refrigerator anytime, anywhere. Its embedded Wi-Fi lets you track and adjust its performance using the SmartThings App*. You can easily control the Rapid Cooling mode, change the temperature and get alerts if the door is left open. It will also detect and diagnose issues.
